ULVANG

WORKBOOK FW23/24

OUR PURPOSE

We are the wool insulation expert for outdoor people. Ulvang's ambition is to be the brand of choice for outdoor loving people of all ages, that have understood, experienced and acknowledged the superior functional and sustainable qualities of wool, as a natural fabric that provides comfort and clear conscience, whenever venturing out in nature.

We Believe In Wool – We Are Wool

RESPONSIBILITY

Ulvang is not only concerned about producing warm, functional and high-quality products, but we also focus on our brands' social and environmental footprint. We work closely with all our suppliers to ensure that we know the country of origin of raw materials and can guarantee the use of non-mulesed wool.

Ulvang is passionate, not only about the fantastic features of wool as a naturally functional fiber, but also about our entire value chain. From the production of raw materials, to manufacturing processes, use, repair and end of life management of our products. The first step of our value chain is the careful selection of sheep farmers. We are frequently visiting our farmers and engage in long-term partnerships in different parts of the world to guarantee the best quality wool and strict animal welfare standards.

Our ethical guidelines are communicated to all our suppliers and are incorporated in all contracts. Suppliers must sign a comprehensive Code of Conduct (COC) agreement. Ulvang employs persons whose main responsibility is to visit our textile producers to ensure that they are complying with our ethical guidelines and COC principles.

Through all our CSR efforts, we want to be a positive force of change for animal welfare, workers, the environment, and the journey towards a responsible and sustainable value chain: from sheep to shreds.
