First delivery week SS: Week 12, 2020

“

*I am proud to have
reintroduced wool to the public*

As an adventurer and athlete, Vegard Ulvang know how well wool performed on expeditions and in competitions. He then developed the first Ulvang product: Ulvang Spesial.

Vegard Ulvang is one of the most successful cross-country skiers of all time. He has won three gold medals, two silver medals and one bronze medal from the Winter Olympic Games, two gold medals, two silver medals and four bronze medals from the FIS Nordic World Ski Championship, as well as multiple World Cup victories and being the overall winner in the World Cup in 1990. Ulvang has also climbed peaks in the Himalayas and the Caucasus, reached the South Pole, crossed Greenland and the Northwest Passage on skis, ridden over Mongolia – and been on countless treks in the Norwegian mountains.

Vegard is still a member of the Ulvang-team, and is involved in both the product development and sales. A good example is the sweater Rav, which was launched in 2005 and became a huge success.

We aim to facilitate for great experiences in nature, and this is illustrated well by Vegard's efforts as a champion for wool. Top quality on our products are, however, not enough. Environmental protection and animal welfare are beams in our business plan.

CORPORATE SOCIAL RESPONSIBILITY

Ulvang is not only concerned about producing warm, functional and high quality products, but we also focus on the company's social responsibility. We work closely with all our suppliers to ensure that we know the country of origin of raw materials and can guarantee the use of non-mulesed wool.

Our ethical guidelines are communicated to all our suppliers and are incorporated in all contracts. Suppliers must sign comprehensive Code of Conduct (COC) agreements. Ulvang employs persons whose main responsibility is to visit our textile producers to ensure that they are complying with our ethical guidelines and COC principles. With our CSR efforts, we support human rights, worker's rights, the environment and development throughout the entire value chain.

All of these efforts reflect our close relationship to nature and our commitment to ensuring a responsible and sustainable value chain for our products. Our objective is to monitor the entire value chain and ensure responsible animal welfare practices.

Our focus on social responsibility has helped create a more sustainable and environmentally friendly collection. This focus will be more and more important for us in the years ahead and will guide much of the work on future collections.

Our focus on social responsibility has helped create a more sustainable and environmentally friendly collection.

SAY HELLO TO ONE OF OUR FARMERS

Alan Pitcher, A passionate farmer who cares about his animals. Owner of Nanimia, together with his wife Fran and his son Russel.

Ulvang is passionate, not only about the fantastic features of wool, but also about the value chain all the way back to our carefully selected farmers. We are frequently visiting our farmers and have over the last years teamed up and formalized long-term partnerships with farmers in different parts of the world. Together with our farmers we share strict animal welfare standards, sustainable manufacturing processes and a general passion for wool as a naturally functional fiber.

You can easily see the quality of the wool. Good height, consistent and clean.

"Sustainable farming is necessary for the life blood of our future on the land"

Alan is out early every morning to look after all his herd.

NANIMIA IS ONE OF OUR SELECTED FARMS IN AUSTRALIA

Over the last 70 years the late Alex Pitcher, and today Alan Pitcher and his son Russel has developed "Nanimia" into a 4000 acres property with more than 5000 Merino sheep. The flock is a self-replacing flock producing fine wool in the 18-19 micron range. The Property Nanimia derived its name from an Aboriginal word meaning "place of small hills".

Alan says they like to have relaxed and happy sheep, that have plenty to eat, good water supply, shelter with good shade during the hot summers and protection in winter and during colder periods. Alan really cares about their animals and treat them humanely. At Nanimia, they stopped mulesing many years ago because the process is inhumane and harms the lambs at a critical period of their lives. With careful selection and the advent of favorable traits, they haven't had problems with fly strikes and have not mulesed sheep the last 15 years. "Sustainable farming is necessary for the life blood of our future on the land"

At Nanimia Alan and his family is looking after approx. 5000 sheep. This is a lifestyle that has been carried on for many generations. They are proud of their flock breed and treat their sheep with an impressive kindness and passion.

High quality fine wool fibers with good elasticity, good length, nice color and good strength.

NORWEGIAN WOOL

Our Norwegian Wool collection is made of 100% traceable and sustainable wool from Norwegian Sheep and Norwegian Wild Sheep.

The wool is from healthy Norwegian sheep that spends all summer and early fall out in the clean and fresh nature of Norway. The result is wool with excellent strength, shine and elasticity. Norwegian Wool is naturally somewhat coarser because of the rougher climate and crazing conditions compared with sheep grazing farther south in Australia or in Spain. This gives the wool some unique and exciting features. Norwegian wool has specific characteristics that make garments more durable and stays in shape after prolonged use and washing. The Norwegian wool has a natural and unique color.

The Norwegian Wool collection is of the best quality and will keep you warm even under the harshest conditions.

If you choose Ulvang's Norwegian wool. You also support a sustainable production with a minimal ecological footprint.

COUNTRY OF ORIGIN: LITHUANIA
WOOL ORIGIN: NORWAY

FERAL

Norway's very traditional Old Norse sheep have been grazing in the coastal landscape on the west coast of Norway ever since the ice retreated 6000 years ago. The Old Norse Sheep is still part of the livelihood of coastal farmers in Norway. This hardy breed, have through numerous of generations, been shaped by rough climate, nutritional basis, landscape and lived in symbiosis with humans where it has been a vital and invaluable supplier of meat, leather and wool to yarn - and again for knitwear.

COUNTRY OF ORIGIN: LITHUANIA
WOOL ORIGIN: NORWAY

50FIFTY 2.0

50Fifty 2.0 is a warm quality, perfect for sensitiv skin. The range features a two-layer Jaquard knit. The inner layer in contact with the skin consists of 100 % polyester, and the outer layer consists of 80 % Merino wool and 20 % Polyamide. The combination allows the inner polyester layer to transport moisture away from the body, while the outer wool layer redistributes the moisture for warmth and insulation. An all-round garment that is extremely comfortable for persons with sensitive skin.

The 50Fifty 2.0 range has been treated so that the garment is machine washable at 40 degrees. Only the longest and thinnest Merino wool fibers are used, creating a fabric that minimizes itch and fabric pilling.

EXTREME MERINO NET

Extreme Merino Net is Ulvang's warmest quality, designed for expeditions with high demands on insulation and comfort. Extreme Merino is made up of 2 layers which together give a unique effect. The inner layer consists of a 100% Merino mesh, the outer layer consists of 100% Merino. The mesh pockets also isolate and transport sweat away from the body. Tested on several expeditions in tough conditions.

THERMO

Thermo is a warm bodywear range for hiking and expeditions in extra low temperatures. The range is made using an interlock design that ensures good moisture transport and added thermal insulation. Underarm mesh sections provide optimal moisture transport as the activity level increases. An extremely warm and comfortable garment that can be worn direct against the skin or as the second layer on cold days.

The Thermo range has been treated so that the garment is machine washable at 40 degrees. Only the longest and thinnest Merino wool fibers are used, creating a fabric that minimizes itch and fabric pilling.

WEIGHT: 200 G
MICRON: 18,5
COUNTRY OF ORIGIN: LITHUANIA
WOOL ORIGIN: AUSTRALIA

HATS & MITTENS

A head without a hat acts like a pipe that much of your body heat will disappear through. When your body temperature falls, the blood supply to your arms, legs and feet is reduced to keep your head and vital internal organs well-supplied with blood and warm. If your feet are cold, put on a warm wool hat.

Layer upon layer applies to your whole body, including your hands. That is why Ulvang make mittens and gloves in 100 % wool for optimal insulation and warmth. With the exception of hammerfest mittens, all our mittens and gloves can be machine-washed at 40°C. We also have Hammerfest wind mittens to wear over Hammerfest mittens.

Arctic Net is our warmest series, developed for expeditions and cold climates where warmth and isolation are highly sought after. Extreme Merino Net consists of an inner layer Merino mesh and an outer layer in 100% Merino wool. The air pockets in the inner layer isolates and transports sweat from the skin. A must have in any adventurers back pack!

- 2-layer wool neck that can be folded double
- 1/2 part Mesh and 1/2 part ribbon.
- Developed for expeditions and cold climates

SOCKS

WHEN YOU'RE ON THE GO

Proper footwear and socks help ensure an enjoyable walking experience. A foot emits approx. 6 cl. liquid per day, and much more in connection with activities. Our advice is simple: change to dry and clean wool socks often. Moisture absorbing materials are recommended. Wool is in a class by itself, since wool can retain up to 30 % liquid without feeling clammy.

Our socks are made of fine quality Merino wool that feels soft against the skin. The wool provides unique breathing and sweat-wicking properties to keep feet warm – even if they get wet. Merino wool is blended with other advanced materials that give the socks additional qualities as well. The socks are perfect for any activity and any area of use.

The socks have been tested both in the laboratory and in the field.

OUR WARRANTY

Not happy with your wool socks from Ulvang? Return to the store where you bought the socks to exchange them for a new pair. The guarantee is valid with receipt and within two years.

WOOL FOR KIDS & JR

Children love playing in the snow and being outside in the fresh air. But as a young explorer, it can be difficult to make the right decisions about clothing before the cold has taken hold, and as an adult it may be difficult to know if the child is warm or cold. Therefore it is important to dress the child in wool that in many ways self-regulates the temperature. The child is then comfortable, and mom and dad can feel more at ease throughout the day.

In the Junior & Kids category, you will find a wide range collection featuring the most important products that you will need both fall and winter. For head, shoulders, knees, toes and so on.

50FIFTY 2.0

KIDS & JR

50Fifty 2.0 is an bodywear series suitable for use in a wide range of activities. The bodywear is made in a two-layer Jaquard knit. The innermost layer, which is in contact with the skin, consists of 100 % polyester. It will feel soft against even the most sensitive skin. The outer layer consists of 80 % Merino wool and 20 % nylon. The inner layer serves to transport moisture away from the body, while the outer layer absorbs the moisture and distributes the heat. A mid-layer of air between the two layers provides extra thermal insulation. The result is a warm and temperature-regulating fabric that is comfortable to wear even for sensitive skin.

10813 - Black/High Rise

RIM LIGHT HAT

49371

Double, but incredibly thin and comfortable hat in Merino wool. Classic, sporty model suitable for everyone. Despite the thinness, this hat insulates well. The air between the two layers serves as an extra thermal layer. Printed Ulvang logo in front. Good elasticity.

- Double layer, but still thin
- Good elasticity
- Machine wash at 40 degrees, wool program
- Available in children's size
- Woolmark certified

COMPOSITION: 100% Merino Wool

SIZES: 56, 58, 60

RIM LIGHT HEADBAND

49381

Finely knitted wool headband. May also be used as neck warmer or folded to make a narrower headband if needed. Perfect for trips in unstable weather or for everyday use. Printed Ulvang logo in front. Good elasticity.

- Multi-use model
- Height approx 10 cm
- Good elasticity
- Machine wash at 40 degrees, wool program
- Available in children's size
- Woolmark certified

COMPOSITION: 100% Merino Wool

SIZES: 56, 58, 60
